SUMMARY

I'm a software engineer, and most of my work has been the backend of animation and VFX studios — the services, tooling and infrastructure that keep the business moving. I try to start with conversation rather than code, the use case discussed, dissected and chunked before anything is built, and to write clean, maintainable code. The work I'm proudest of is the quiet kind — a publish that just works, a deploy that stops being an event.

SKILLS

Languages: Python, Bash, SQL, Groovy (Jenkins Pipeline), Lua (Katana OpScript)
Infrastructure: Linux (RHEL/Rocky) · Docker · Git · Jenkins, GitHub Actions · Ansible · rez
Services & cloud: FastAPI, Flask, REST APIs · AWS (EC2, Lambda, API Gateway, Secrets Manager) · PostgreSQL, MongoDB · Opsgenie
Domain APIs & SDKs: ShotGrid/Flow + SGTK, Deadline, Tractor, AYON, USD, Qt/PySide · Maya, Houdini, Katana, Nuke, Unreal Engine · RenderMan, Arnold

EXPERIENCE

Flying Bark Productions · *Lead Pipeline TD (Technical Director)* May 2025 – Present
Ghostbusters: Night Shift (Netflix / Sony Pictures Animation)

- Lead the show's pipeline TD team: show requests, sprint planning, development roadmap and reporting to production and pipeline management.
- Liaise between CG supervisors, production and pipeline on technical approach and priorities.
- Plan and guide major long-term development epics to completion.
- Manage and support the unblocking of major production problems.
- **Stack:** ShotGrid/SGTK, rez, Tractor, Jenkins/Bitbucket, Maya, Houdini, Nuke, RenderMan, Substance.

Saffronic (Tech Mahindra) · *Lead Pipeline TD (contract)* Apr – May 2025

- Managed the pipeline transition of Mickey Mouse Clubhouse+ (Disney Jr.) from Mikros Animation to Saffronic after the Technicolor shutdown.

Mikros Animation (Technicolor Creative Studios) · *Lead Technical Director* Jan 2023 – Feb 2025

- Led developer teams building and maintaining workflow tools and pipelines; planned annual and quarterly roadmaps with the Head of Production Technology.
- Modernised the codebase: SVN-to-GitHub migration with code-analysis tooling; rez packaging and release workflow; CI/CD from first commit to deployment; code review, style and ticket standards.
- Built the team's ticketing system — front end, back end and reporting — the backbone for tracking development work.
- Services and APIs for asset and resource management and deployment; internal interfaces to the Mikros platform and production data; monitoring for code performance, server health and traffic.
- Role ended with the Technicolor group closure, February 2025.

Basilic Fly Studio · *Senior Pipeline Developer (consultant, part-time)* Aug 2023 – Apr 2024

- Set up the pipeline team's foundational backend frameworks with the Head of Pipeline; scoped project charters, ran sprints, briefed and mentored developers on standards and industry workflows.
- Jenkins CI/CD; rez release and packaging; Ansible for studio-wide configuration and software deployment; USD API for authoring layers and references from assets; tested and deployed AYON.

Redesign Group (OptizmGlobal) · *Lead Pipeline Developer (consultant)* Aug 2022 – Mar 2023

- Custom ShotGrid Desktop apps and configs; integrations with Slack, Aspera, Rclone and AWS S3.

- ShotGrid event daemon and webhooks on AWS (EC2, Lambda, API Gateway, Secrets Manager) with auto-restart services; Opsgenie service monitoring; framework for provisioning users across client ShotGrid sites via the API.

Futureworks Media · *Pipeline TD, then Pipeline Lead* Mar 2020 – Sep 2022

- Built a unified, cross-platform pipeline across three sites (Mumbai, Chennai, Hyderabad) on ShotGrid Toolkit: publishing, file sync, version-controlled engine and app installs, project-based configs, farm submission and event triggers, custom wrappers for Maya, Mari, Katana, Nuke and Houdini.
- SGTK Core integration for Katana; template-based, procedural lookdev and lighting pipeline (OpScript/Lua) with minimal artist input.
- Upgraded the pipeline to USD workflows and the tool stack to Python 3; colour management; software distribution and package management.
- Led and mentored the TD team; ran hiring, training and reviews with HR; built the Chennai CG team from graduates who went on to deliver award-winning work.

ARK Infosolutions · *Python Developer, M&E* Sep 2017 – Mar 2020

Autodesk / Foundry / Unity channel partner

- Deployed ShotGrid, Maya/Arnold, Katana, Mari, Nuke and Unity into animation, VFX and games pipelines at studios across India; debugged production datasets alongside Autodesk support engineers.
- Custom ShotGrid local file publisher, session logging and ShotGrid API and event-trigger tools; workflow documentation and training.

Freelance · *Pipeline Developer / CG Generalist* Sep 2016 – Sep 2017

- Pipeline development and deployment for small and mid-sized studios; design, animation and rendering for commercials.

Xentrix Studios · *Lookdev TD* Jun 2013 – Sep 2016

- Look development and workflow design for surfacing and post: shader libraries, light rigs, standard and custom render passes, comp templates; batch and automation scripting; rolled out 3Delight studio-wide.
- Lookdev lead on DreamWorks, Lego (Nexo Knights) and Disney projects; WB Batman and Nickelodeon titles.

EDUCATION

Supinfocom Rubika, Pune · *Master's in Applied Arts: Visual Effects & Motion Graphics* 2010 – 2013

AWARDS

Masque (CG short) — Best Animated Short Film, student: FICCI BAF 2014 and SRFTI 2014; ASIFA India jury selection 2013.

WORK RIGHTS

Subclass 408 visa; employer sponsorship required for a new role.
